The APL+Win v14.0.02 release is available and recommended for all current APL+Win subscribers. To obtain this release, visit <http://www.apl2000.com/software.php> and click "APL+Win v14.0.02 Update" or "APL+Win v14.0.02 installer".

The APL+Win 14.0.02 includes the following fixes:

1. The optimization to the Enlist primitive function in v14.0.01 did not return correct results for empty nested arrays where the prototype was a simple vector.
2. The crash logging mechanism can fail to produce its full output if it encounters an error while generating the crash dump file.
